

Document 33. Topic Self-Assessment Tracker

Topic-by-topic mastery tracker. Update at the end of each week. The tracker shows where to allocate next week's revision time.

Section A. Confidence Rating Scale

- **1 — Not started.** I have not studied this topic in depth.
- **2 — Aware.** I know definitions but cannot apply yet.
- **3 — Practising.** I can analyse with the framework but make errors.
- **4 — Confident.** I can analyse and evaluate to a 7–8/10 standard.
- **5 — Mastered.** I can score 9/10 or 10/10 under exam time.

NOTE: Rate yourself honestly. Inflated scores cost you marks in the actual exam. Every week, the lowest-scored two topics receive priority study time.

Section B. Microeconomics Topic Tracker

Topic	W1	W2	W3	W4	W5	W6
PPC, Scarcity, Opportunity Cost						
Demand, Supply, Equilibrium						
Elasticities (PED, YED, XED, PES)						
Externalities						
Merit / Demerit / Public Goods						
Information Failure						
Market Structures (PC, MC, Oligo, Mon.)						
Government Intervention						

Section C. Macroeconomics Topic Tracker

Topic	W1	W2	W3	W4	W5	W6
AD-AS Framework						
Multiplier and Circular Flow						
Macro Aims and Trade-offs						
Standard of Living						
Inflation & Deflation						
Unemployment						
Economic Growth						
Balance of Payments						
Exchange Rate Systems						
Fiscal Policy						
Monetary Policy (MAS)						
Supply-Side Policies						
International Trade						
Trade Policies / Protectionism						
Globalisation						

Section D. Skills Tracker

Skill	W1	W2	W3	W4	W5	W6
CSQ data interpretation						
Diagram drawing under time						
Evaluation writing						
Essay planning (5 min)						
Time management						
Singapore evidence recall						

Section E. Weekly Reflection Prompt

At the end of each week, answer three questions in 2–3 sentences each:

1. What is one topic where my score improved this week? Why?
2. What is one topic that is still rated ≤ 3 ? What specific gap will I close next week?
3. What is one practice routine I will adjust?
